

## UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

339235

May 17, 1979.

Mr. Ed Lecarreaux, President  
 Duane Marine Corporation  
 26 Washington St.  
 Perth Amboy, NJ

Dear Mr. Lecarreaux:

In order to complete my evaluation of the conformance to 40 CFR 112, the Spill Prevention Control and Countermeasure regulation, I will need to be supplied the following information.

1. The date which Duane Marine Corporation began any oil producing, gathering, storing, processing, refining, transferring, distributing or consuming at your Perth Amboy location.
2. The date which you began any other operations at Perth Amboy with a brief description of those operations.
3. The maximum number of barrels stored at your facility.
4. Was the concrete dike around the large oil tank leak-proofed and cracks repaired? If so, please supply the date this was accomplished and the technique employed.

As we discussed, aside from any other action the Environmental Protection Agency may initiate relative to Duane Marine, I would suggest, pending receiving your reply to the letter, completion of my review and written notification to you concerning certain deficiencies in the preparation and implementation of your SPCC Plan; that you, your professional engineer and I meet to informally and in good faith initiate correction of those deficiencies.

Very truly yours,

Michael V. Polito  
 Hazardous Materials Consultant
